Our customer

#whatourcustomerssay

" I am glad that we have implemented such an important project for the university as the introduction of campus WiFi solutions with Spectrum. With the help of a highly qualified team of the spectrum, we were able to create a continuous and high-quality wireless network infrastructure, which effectively streamlines our academic and administrative processes. "

Informational security manager Pasha bank

Zaza Gabashvili

" One of the most important issues in infrastructure development is a properly planned data center, which will take into account not only the current requirements of the company, but also the prospects for future development. An important factor in the tasks of the spectrum was the implementation of upgrades in parallel with the continuous delivery of services; this could only be achieved through effective management, which has been successfully implemented. We are grateful to the Spectrum team, similar projects are an important step in strengthening both companies. "

McDonald's Georgia IT Manager

Nika Mchedlishvili

" I am glad that we have implemented such an important project for the university as the introduction of campus WiFi solutions with Spectrum. With the help of a highly qualified team of the spectrum, we were able to create a continuous and high-quality wireless network infrastructure, which effectively streamlines our academic and administrative processes. "
